

Ritwik Shetty

Data Scientist

✉ ritwikshetty05@gmail.com ☎ +91 9892854782 📍 Mumbai 🔗 LinkedIn

PROFILE

Data Scientist with hands-on experience in finance, combining strong expertise in Python, machine learning, and statistical modeling. Skilled in regression analysis, model evaluation, and data visualization to analyze financial data, market trends, and investment performance. Experienced in building end-to-end ML pipelines, developing analytical and financial reports, and translating complex datasets into actionable business and trading insights. Comfortable working in agile, fast-paced environments, collaborating with cross-functional teams, and maintaining high standards of code quality, documentation, and data discipline. Motivated to apply data science and financial analytics skills to real-world, production-grade decision-making and investment systems.

EDUCATION

B.Tech Data Science , NMIMS University, Mumbai	2023 – 2027
Diploma Computer Science , NMIMS University, Mumbai	2021 – 2023

SKILLS

Programming

Python, C, C++, HTML, CSS, JavaScript, SQL

Machine Learning

Supervised Learning, Regression & Classification, Recommendation Systems, Model Training and Evaluation

Deep Learning and Computer Vision

CNN, Image Preprocessing & Feature Extraction, Facial Emotion Recognition

Data Visualisation and Reporting

PowerBI, Tableau, Analytical and Insight-driven reporting, Dashboard ready visual outputs

PROJECTS

Movie Recommendation System

- Built a personalized movie recommendation engine using machine learning techniques
- Applied content-based and collaborative filtering with similarity measures
- Performed data preprocessing, model evaluation, and result visualization to improve recommendation accuracy

Emotion Detection Using Facial Expressions (CNN)

- Designed an emotion recognition system using Convolutional Neural Networks (CNNs)
- Performed image preprocessing, feature extraction, training, and evaluation
- Classified facial expressions into multiple emotion categories with reliable accuracy

WhatsApp Chat Analyzer

- Developed a tool to analyze WhatsApp chat data for user behavior insights
- Conducted text preprocessing, statistical analysis, and sentiment evaluation
- Created visualizations to identify activity trends, message frequency, and user engagement
